

D-FENCING GATES

D-Fencing offers a comprehensive range of high-security gate solutions, including slide, cantilever, double swing, pedestrian, ballistic-rated, and anti-ram gates, engineered to meet diverse operational and threat-level requirements. Each system is designed for durability, reliability, and seamless integration with perimeter fencing, access control, and monitoring technologies. From high-cycle access points to hardened vehicle-impact and ballistic-resistant applications, D-Fencing gates are configurable to site-specific layouts, traffic demands, and security objectives, delivering controlled access without compromising perimeter integrity.
